

YOUR PROJECT, OUR PASSION

FPT THAILAND

FPT Global began operations in 2017, and since then has quickly become one of the leading providers of logistics solutions within Thailand and the neighbouring countries.

Our Directors and core management team have over 20-years logistics experience in Thailand and the surrounding regions, while our offices and facilities are manned by experienced cargo professionals.

We specialise in project cargo, road transport (standard and OOG), warehousing, customs clearance, and cross-border operations between Thailand, Laos PDR, Myanmar and Vietnam.

FPT VIETNAM

FPT Vietnam opened in 2019. The Head Office in Ho Chi Minh City is fully equipped to provide customers with sales, technical and administrative support.

Ho Chi Minh, as the biggest city is the epicentre for business and is the ideal location for FPT Global to service current and future clients across the region.

Our service offering in Vietnam mirrors what we provide in Thailand and increases our foothold in Southeast Asia.

MANPOWER & CONSULTANCY

We offer multiple types of service contracts we cover staffing and consultancy for all aspects, whether its short-term emergency hire to full project consulting, we have the right people ready to mobilized work with our clients wherever they're required. Combining a strong technical understanding with an appreciation of the local cultures and customs here in APAC.

FPT GLOBAL SITE MANAGEMENT

Planning and executing a successful project is a highly complex, extensive process that requires a detail-driven approach to get it right. An oversight in managing interfaces or an issue during permitting can not only result in delays, but can have a costly impact on your business case.

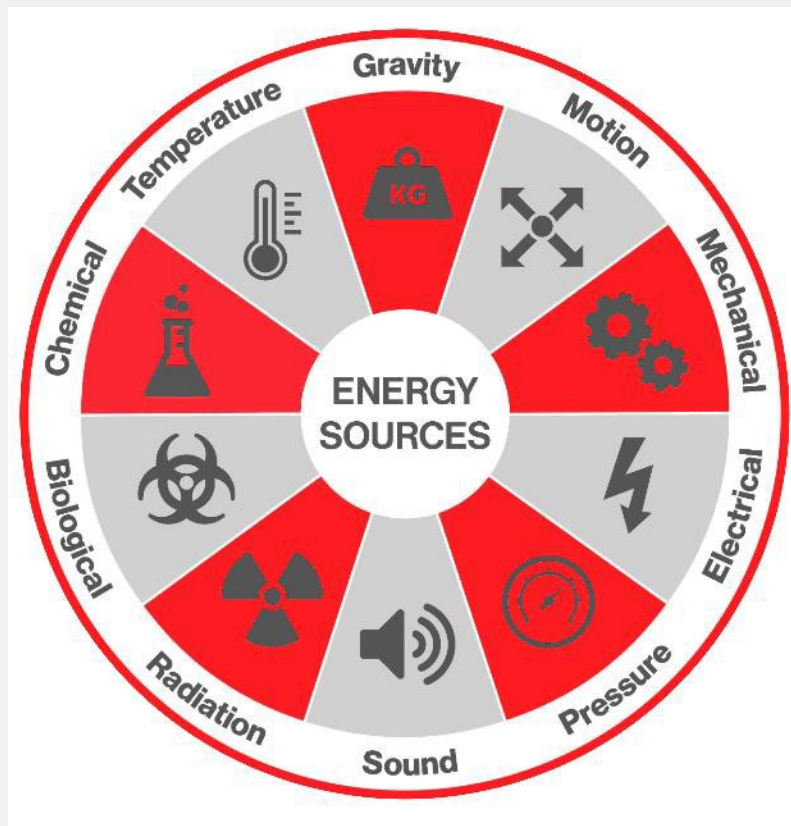

Working with a highly-experienced team of project managers to manage project execution can not only minimize risk, but can ensure that your project is delivered on-time and on-budget.

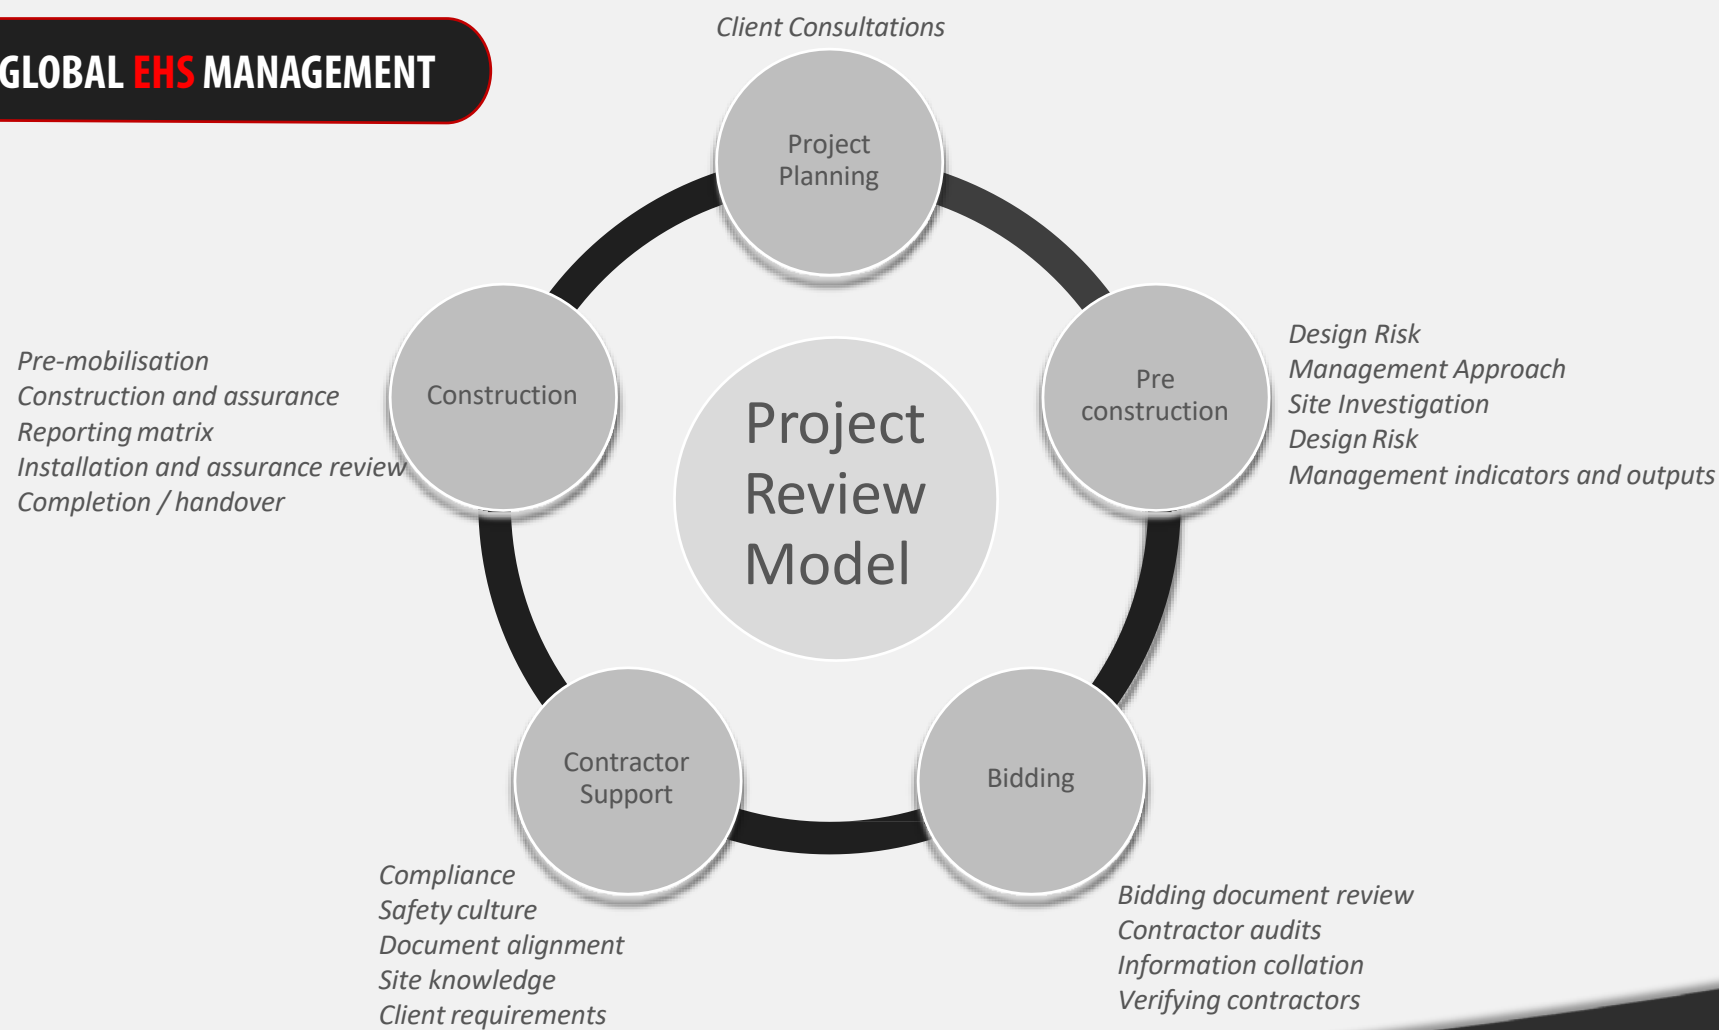

FPT GLOBAL EHS MANAGEMENT

CONSTRUCTION HEALTH AND SAFETY MANAGEMENT

- Site safety inspections
- Assessing the skills, knowledge and experience of Contractors
- Hazard Identification Workshops (HAZID) and other specialist safety tools
- General health and safety management
- Preparation of safety management systems
- Review and gap analysis of existing safety management systems
- Internal health and safety audits prior to audit by certifying bodies
- Accident investigation
- Incident
- Health and safety management of wind turbine inspections
- Organisational capability by utilising experienced in-house project management, designers, engineers and safety personnel

FPT GLOBAL EHS MANAGEMENT

MANAGEMENT TEAM

Michael Andrews

FPT Global

Managing Director (Thailand)

With 20 years on the ground experience of all types of logistics in the APAC region, directly liaising and managing multiple contracts through to completion.

Starting out in warehouse management, fulfilling major client's orders, Mike progressed into Heavy Project Logistics 10 years ago, running the full APAC Project scope for Chevrans "Barrow Island" marshalling Yards in Thailand and Vietnam. Mike went into business 3 years ago and has since made a huge impact in the project logistics industry by offering excellent service, honest work ethics and a hunger to ensure operations are executed safely, on time and in budget.

MANAGEMENT TEAM

Brett Malcolm

FPT Global

Managing Director (Vietnam)

Brett Malcolm Managing Director of FPT Global Vietnam has over 25 years' experience in the logistics sectors including 16 years in the country. His diverse experience ranges from simple freight forwarding activity to large-scale heavy-duty projects through Laos, Cambodia and Vietnam.

MANAGEMENT TEAM

Capt. Soraphong Pornngam

FPT Global

Operations Director

Capt. Soraphong is a well-known and well-respected Thai National Marine Captain with extensive experience in the maritime sector; over the years he has forged strong relationships with the local marine and shipping industry. Along with his captaincy, Capt. Soraphong has also worked as a reliable Operations Manager on the ground in Thailand and the surrounding regions.

He excels in man-management having undertaken many projects with more than 200 employees under his remit. Due to his vast experience, Capt. Soraphong has a great understanding of clients needs and processes coupled with expert knowledge in HSE requirements.

MANAGEMENT TEAM

Ronald Johnson

FPT Global

Director – Renewable Energy & Development

Ron began his career in renewable energy as an installation technical advisor for GE and quickly progressed to the highest level of North America's Pole Installation Manager.

A strong track record of assisting in the design and implementation of procedures that reduce labour costs and improve operation efficiency.

Ron is a results driven professional with a history of critical thinking, problem solving and effective communication on a multitude of renewable energy projects around the world. Throughout all his roles in the industry Ron has developed safer work environments and created a positive atmosphere for all the teams and employees he has worked alongside.

MANAGEMENT TEAM

Earl C. Brown

FPT Global

Marketing Director APAC

Originally began his logistics career working on the warehouse floor for the Pinault Printemps Redoute group in the UK, quickly rose to management level becoming the training and development manager in less than five years with the company. Over the following years, Earl developed skills in the marketing of logistics before leaving the UK in 2004 to travel around Southeast Asia and eventually pursue a career in that region.

Joined a prominent Logistics company in Thailand to develop their Marketing, Communications and Brand identity to aid and promote the company's growth throughout the region. During his tenure, Earl increased presence and brand awareness within the targeted demographics and developed a comprehensive and structured marketing program.

In 2018 Earl joined FPT Global as Marketing Director to implement and develop their marketing programs strategies across the Asia-Pacific region.

- 120t -1200t Mobile cranes
- Kroll 1650 Tower crane with advance base
(this allows us to populate the ext. base whilst still lifting the first one)
- Multiple smaller MHE

PROJECT TESTIMONIAL

Mario Plaschke

General Electric
Senior Project Manager

"Mike Andrews and the FPT Global teams stepped up when we were at a critical turning point and desperately needed a strong partner to help compensating for construction delays and to overcome tough schedule challenges.

FPT's broad experience, their excellent logistics network and their outstanding reputation in the business were key to quickly line up highly qualified resources, to recover delays and meet our customer requirements with regards to the delivery and construction completion of Thailand's biggest Renewables Onshore Wind project, Thepharak.

Leaving your safe comfort zone, taking more risk and going above and beyond the call of duty is exactly what it takes to be successful in this business, many thanks to all the teams!"

SAFETY PROTOCOLS
