

FACTORY & PLANT INSTALLATIONS

FPT Global provides installations and machinery movements from single machines to complete factory relocations. Our project teams specialize in plant and machinery erection and dismantling, industrial pipework, electrical installations, hydraulic lift systems, complete factory removals and many other turnkey projects.

Our fully qualified project teams ensure that all factory & plant installation of equipment is performed at the highest level regarding safety, quality, efficiency and professionalism. Due to our extensive logistics network we can also provide multimodal transportation for all your plant & factory equipment, machinery and systems.
